EXECUTIVE SUMMARY – ENGLISH

NexGold Mining Corp. (NexGold), formerly Treasury Metals Inc. (Treasury), is proposing the construction, operation, decommissioning, and abandonment of an open-pit and underground gold mine and associated infrastructure. The Goliath Gold Project (Project), located 20 kilometres (km) east of the City of Dryden, Ontario, will have an anticipated mine and mill life of 13 years. Over the 13 years of operations, the average ore production and ore input capacity of the mine and mill would be 6,460 tonnes per day.

Treasury received a Federal government Decision Statement for the Project under the *Canadian Environmental Assessment Act, 2012* (CEAA, 2012) on 19 August 2019 (Decision Statement), with the Minister of Environment and Climate Change Canada concluding that, with the implementation of mitigation measures, the Project is not likely to cause significant adverse environmental effects referred to in subsection 5(1) CEAA, 2012.

As of 30 June 2025, NexGold had not announced a formal decision to advance the Goliath Gold Project. As such, the Project remains in the evaluation (design and planning) phase.

As per Condition 2.9, NexGold is required to prepare an annual report each reporting year (defined in the Decision Statement as July 1 to June 30) commencing the reporting year the decision statement was issued. As per Condition 2.10, NexGold has until October 31 following the reporting year to issue the report.

The purpose of this report is to satisfy Conditions 2.9 and 2.10 of the Decision Statement. It contains a project update, NexGold's approach to compliance management, an update on follow-up and adaptive management programs, the compliance status of federal decision statement commitments and a summary of key consultation and engagement activities.

SOMMAIRE EXÉCUTIF – FRANÇAIS

NexGold Mining Corp. (NexGold), anciennement Treasury Metals Inc. (Treasury), propose de construire, exploiter, désaffecter et abandonner une mine d'or à ciel ouvert et souterraine ainsi que les infrastructures associées. Le projet aurifère Goliath (projet)—situé à 20 kilomètres (km) à l'est de la ville de Dryden, en Ontario—aura une durée de vie prévue de 13 ans pour la mine et l'usine. Au cours des 13 années d'exploitation, la production moyenne de minerai et la capacité d'entrée de minerai de la mine et de l'usine seraient de 6 460 tonnes par jour.

Le 19 août 2019, Treasury a reçu une déclaration de décision du gouvernement fédéral concernant le projet en vertu de la *Loi canadienne sur l'évaluation environnementale* (2012) (LCEE, 2012). Le ministre de l'Environnement et du Changement climatique du Canada a conclu qu'avec la mise en œuvre de mesures d'atténuation, le projet n'est pas susceptible d'entraîner des effets environnementaux négatifs significatifs visés au paragraphe 5(1) de la LCEE, 2012.

Au 30 juin 2025, NexGold n'avait pas annoncé de décision formelle pour faire avancer le projet aurifère Goliath. Le projet reste donc en phase d'évaluation (conception et planification).

Conformément à la condition 2.9, NexGold est tenu de préparer un rapport annuel pour chaque année de déclaration (définie dans la déclaration de décision comme allant du 1^{er} juillet au 30 juin) à compter de l'année de déclaration au cours de laquelle la déclaration de décision a été émise. Conformément à la condition 2.10, NexGold a jusqu'au 31 octobre suivant l'année de déclaration pour publier le rapport.

Le but du présent rapport est de satisfaire aux conditions 2.9 et 2.10 de la déclaration de décision. Il contient une mise à jour du projet, l'approche de NexGold en matière de gestion de la conformité, une mise à jour des programmes de suivi et de gestion adaptative, l'état de conformité aux engagements de la déclaration de décision fédérale, ainsi qu'un résumé des principales activités de consultation et d'engagement.

1.0 INTRODUCTION

NexGold Mining Corp. (NexGold), formerly Treasury Metals Inc. (Treasury), is proposing the construction, operation, decommissioning, and abandonment of an open-pit and underground gold mine and associated infrastructure. The Goliath Gold Project (the “Project”), located 20 kilometres (km) east of the City of Dryden, Ontario, will have an anticipated mine and mill life of 13 years. Over the 13 years of operations, the average ore production and ore input capacity of the mine and mill would be 6,460 tonnes per day. The regional location of the Project is shown on Figure 1.

As described in correspondence with IAAC on August 21, 2024, Treasury Metals Inc. changed its name to “NexGold Mining Corp.” effective July 9, 2024.

Treasury received a Federal government Decision Statement for the Project under the *Canadian Environmental Assessment Act, 2012* (CEAA, 2012) on 19 August 2019 (Decision Statement), with the Minister of Environment and Climate Change Canada concluding that with the implementation of mitigation measures, the Project is not likely to cause significant adverse environmental effects referred to in subsection 5(1) CEAA, 2012. The Minister’s Decision Statement also established conditions in relation to the environmental effects, which must be complied with in order to advance the Project. NexGold is aware of the legal requirements and commitments made during the Environmental Assessment (EA) process and will ensure their implementation in a careful and precautionary manner. The EA Project Study Area is shown on Figure 2.

As of 30 June 2025, NexGold had not announced a formal decision to advance the Goliath Gold Project. As such, the Project remains in the evaluation (design and planning) phase. The follow-up programs required as per conditions 3.13, 3.14, 3.15, 4.5, 4.6, 4.7, 5.2, 5.3, 6.8, 6.9, 7.3, 7.4, and 7.5 are scheduled for development and implementation once the Project has moved past the evaluation phase, and into the pre-construction phase.

As per Condition 2.9, NexGold is required to prepare an annual report each reporting year (defined in the Decision Statement as July 1 to June 30) commencing the reporting year the decision statement was issued. As per Condition 2.10, NexGold has until October 31 following the reporting year to issue the report.

2.0 REPORT SCOPE AND REQUIREMENTS

The scope of this Annual Report is to outline how NexGold has complied with the conditions of the Decision Statement. This report covers the Project activities undertaken by NexGold during the cumulative reporting period, 01 July 2024 to 30 June 2025 inclusive (herein referred to as the “reporting period”).

Condition 2.9 of the Decision Statement outlines the Annual Report information requirements for the Project. *Table 2-1* outlines the section references within this document that demonstrate concordance with these requirements.

Table 2-1: Annual Reporting Information Requirements and NexGold Concordance

Condition	NexGold Concordance
2.9: The Proponent shall, commencing in the reporting year during which the Minister issues the Decision Statement on the Designated Project, prepare an annual report that sets out:	
2.9.1: the activities undertaken by the Proponent in the reporting year to comply with each of the conditions set out in this Decision Statement;	Appendix A provides a list of all Decision Statement conditions and describes the activities undertaken by NexGold in the reporting period to comply with each condition.
2.9.2: how the Proponent complied with condition 2.1;	In addition to Appendix A, further information is provided in Section 4 (Approach to Compliance Management).
2.9.3: for conditions set out in this Decision Statement for which consultation is a requirement, how the Proponent considered any views and information that the Proponent received during or as a result of the consultation;	In addition to Appendix A, further information is provided in Section 5 (Consultation and Engagement).
2.9.4: the information referred to in conditions 2.4 and 2.5 for each follow-up program;	In addition to Appendix A, further information is provided in Section 6 (Follow-Up and Adaptive Management).
2.9.5: the results of the follow-up program requirements identified in conditions 3.13, 3.14, 3.15, 4.5, 4.6, 4.7, 5.2, 5.3, 6.8, 6.9, 7.3, 7.4, and 7.5;	In addition to Appendix A, further information is provided in Section 6 (Follow-Up and Adaptive Management).
2.9.6: any modified or additional mitigation measures implemented or proposed to be implemented by the Proponent, as determined under condition 2.7; and	In addition to Appendix A, further information is provided in Section 6 (Follow-Up and Adaptive Management).
2.9.7: any change(s) to the Designated Project in the reporting year for which the Proponent determined that condition 2.15 did not apply.	In addition to Appendix A, further information is provided in Section 3 (Project Update).

3.0 PROJECT UPDATE

This section provides a general update on the design and planning phase activities undertaken for the Project during the reporting period. The overall implementation schedule has been included to provide context for scope of this report and compliance reporting timeframes.

During the reporting period, NexGold commenced a Feasibility Study (FS) for the Goliath Gold Complex. The FS is being prepared in accordance with National Instrument 43-101 – Standards for Disclosure for Mineral Projects. Advancing technical engineering activities will provide the detail required for NexGold to move through the permitting process at a federal and provincial level, prior to advancing potential development at the Project. Baseline and technical studies, as well as community engagement, continue to support these activities.

NexGold has announced certain potential positive outcomes as it works towards the completion of its FS, including environmental protection and surface area optimizations. This work has resulted in the proposed reduction in the overall development footprint relative to the PFS. It is believed that there is potential to reduce the TSF surface area by up to 50% through the refinement of the mine plan. This change results in a reduction of waste rock volumes, potentially eliminating the need for the South Waste Rock Storage Area contemplated in the PFS. The reduction in the TSF surface area eliminates overprinting any waterways where fish are present; as such, a MDMER Schedule 2 amendment identified in the 2019 EA and PFS shall potentially no longer be required to advance the Project development. Optimization of mine sequencing will also potentially allow for earlier closure and remediation of the TSF and Waste Rock Storage Area, with the goal to be able to segment/isolate potentially acid-generating and non-acid-generating wastes as soon as possible. Enhancement to water management systems is expected to result in reduction and minimization of effluent discharges.

As of 30 June 2025, NexGold continues to advance technical engineering activities, and is working towards the completion of the FS.

Table 3-1: Estimated Project Milestones

Project Phase	Start Date	Completion Date ¹	Duration ¹
Design and Planning – PFS	August 2019	March 2023	3.5 years
Design and Planning – Value Engineering	H1 2023	H1 2024	1 year
Design and Planning - FS	H1 2024	H2 2025	1 year
Construction	H1 2026	H2 2027 ²	1.5 years
Operations	H1 2028 ²	H1 2040 ²	12 years
Closure	2041	-	-
Decommissioning ³	2041	2043	2 years
Closure ⁴ and Site Close Out ⁵	2043	2073	30 years
¹ Completion dates and durations are approximate and are subject to change and will be based on monitoring results and direction from regulatory authorities. ² H1 refers to January through June; H2 refers to July through December. ³ Decommissioning: Demolition and major site rehabilitation activities. Pumping and monitoring activities implemented. ⁴ Closure: The open pit is allowed to flood. Pumping and monitoring activities implemented ⁵ Close Out: Commences once the open pit is flooded and passively discharges to Blackwater Creek.			

4.0 APPROACH TO COMPLIANCE MANAGEMENT

This section is to outline how NexGold will approach the monitoring and maintenance of Project compliance with regulatory requirements and commitments during the reporting period, and provides information on how NexGold is maintaining compliance with Condition 2.1:

The Proponent shall ensure that its actions in meeting the conditions set out in this Decision Statement during all phases of the Designated Project are considered in a careful and precautionary manner, promote sustainable development, are informed by the best information and knowledge available at the time the Proponent takes action, including community and Indigenous traditional knowledge, are based on methods and models that are recognized by standard-setting bodies, are undertaken by qualified individuals, and have applied the best available economically and technically feasible technologies.

NexGold continues to design and advance engineering details related to the Project in a manner that aligns with the company's corporate standards and policies. NexGold considers and incorporates the expertise of a team of qualified engineering and environmental consultants to support ongoing engineering and ongoing engagement with Indigenous communities.

NexGold is committed to continued compliance with the provisions of the Decision Statement throughout all Project phases. NexGold has begun preliminary development of an environmental management system with the aim of ensuring that EA, permit conditions and other commitments are implemented effectively.

5.0 CONSULTATION AND ENGAGEMENT

Refer to Appendix B for a summary of key consultation and engagement activities undertaken during the reporting period.

6.0 FOLLOW-UP AND ADAPTIVE MANAGEMENT

This section provides a summary of activities undertaken during the reporting period related to the follow-up programs required by Conditions 3 (3.13, 3.14, 3.15), 4 (4.5, 4.6, 4.7) 5 (5.2, 5.3), 6 (6.8, 6.9) and 7 (7.3, 7.4, and 7.5).

6.1 Fish and Fish Habitat

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

6.2 Migratory Birds

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

6.3 Wetlands

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

6.4 Land and Resource Use for Traditional Purposes

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

6.5 Health of Indigenous Peoples

This condition is not currently applicable. Follow-up programs are scheduled for development and implementation prior to construction.

7.0 CLOSING

At this stage, the Project continues to be in the evaluation stage with on-going environmental programs to complement baseline and technical studies. NexGold is in the process of completing the FS, which will provide the required level of detail to advance the Project through the federal and provincial permitting processes, and follow-up program development.

The Proponent shall consult with relevant authorities when deciding on the type of liner to be used in contact water collection ditches; -3.6.3 combine contact water from the low-grade ore stockpile and waste rock storage area with other site contact water when acid rock drainage is not occurring. If acid rock drainage is occurring, the Proponent shall treat the contact water from the low-grade ore stockpile and waste rock storage area prior to combining with other site contact water. The Proponent shall have a qualified individual determine whether acid rock drainage is occurring; and -3.6.4 direct contact water from the waste rock storage area, overburden stockpiles, and tailing storage facility to the open pit during decommissioning.							
EA-FC3.7	The Proponent shall develop prior to construction and implement during all phases of the Designated Project, measures to control erosion and sedimentation within the Designated Project area in a manner consistent with the <i>Fisheries Act</i> and its regulations. The Proponent shall submit these measures to the Agency before implementing them.	N	Y	Y	Y	Y	Annual Compliance Report	<i>Not currently applicable. 	Environment's <i>Canadian Ambient Air Quality Standards</i> and Ontario's <i>Ambient Air Quality Criteria</i> . The Proponent shall monitor total suspended particulate matter, including trace metals, at a minimum frequency of monthly; and -7.3.4 if the sampling and monitoring results referred to in condition 7.3.2 and 7.3.3 exceed the predictions made during the environmental assessment, implement any modified or additional mitigation measures pursuant to condition 2.7 based on the results of the follow-up program and update the human health risk assessment identified by the Proponent in the Final Human Health and Ecological Risk Assessment (February 2019), submitted as part of <i>Response to Information Request Round 2</i> using the results of the sampling and monitoring.							
EA-FC7.4	The Proponent shall develop, prior to construction and in consultation with Indigenous groups and relevant authorities, a follow-up program to verify the accuracy of the environmental assessment and determine the effectiveness of the mitigation measures as it pertains to adverse environmental effects of the Designated Project on the health of Indigenous Peoples caused by changes in concentrations of contaminants of potential concern in vegetation, fungi and wildlife, including fish. As part of the development of the follow-up program, the Proponent shall determine in consultation with Indigenous groups, the vegetation, fungi, and wildlife species, including fish, and their components, that shall be monitored, the locations where the monitoring shall be conducted, the contaminants to be monitored and the timing and frequency of the monitoring. The Proponent shall implement the follow-up program from construction through decommissioning. In doing so, the Proponent shall: -7.4.1 monitor beginning three months prior to construction and continuing through decommissioning, contaminants of potential concern, including arsenic, cobalt, lead, mercury, methylmercury, and zinc in vegetation, fungi and wildlife species, including fish, at a minimum sampling frequency of annually;	N	Y	Y	Y	Y	Annual Compliance Report; Records of Engagement	<i>Not currently applicable. 	-7.4.2 if thallium monitoring pursuant to condition 7.5.4 exceeds the predictions in the environmental assessment, monitor thallium concentrations in vegetation, fungi and wildlife species, including fish, at a minimum sampling frequency of annually through decommissioning; and -7.4.3 if the sampling and monitoring results referred to in condition 7.4.1 exceed the predictions made during the environmental assessment, implement any modified or additional mitigation measures pursuant to condition 2.7 based on the results of the follow-up program and update the human health risk assessment identified by the Proponent in the Final Human Health and Ecological Risk Assessment (February 2019), submitted as part of <i>Response to Information Request Round 2</i> using the results of the sampling and monitoring. The Proponent shall integrate the current and predicted consumption patterns of each Indigenous group identified during the environmental assessment in the updated human health risk assessment and any updated consumption pattern information provided by Indigenous groups as part of the follow-up program.							
EA-FC7.5	The Proponent shall develop, prior to construction and in consultation with Indigenous groups and relevant authorities, a follow-up program to verify the accuracy of the environmental assessment and determine the effectiveness of the mitigation measures as it pertains to adverse environmental effects of the Designated Project on the health of Indigenous Peoples caused by changes in concentrations of contaminants of potential concern in water. As part of the development of the follow-up program, the Proponent shall identify the locations where the monitoring shall be conducted, the contaminants to be monitored and the frequency of the monitoring. The Proponent shall implement the follow-up program from construction through abandonment. As part of the development of the follow-up program, the Proponent shall: -7.5.1 establish, prior to construction and in consultation with relevant authorities, sulphate concentration limits for effluent discharged into Blackwater Creek and for water in Thunder Lake Tributaries 2 and 3, Hoffstrom's Bay Tributary, Thunder Lake;	N	Y	Y	Y	Y	Annual Compliance Report; Records of Engagement	<i>Not currently applicable.
